PLAN 320

AQUA SCAPE 420

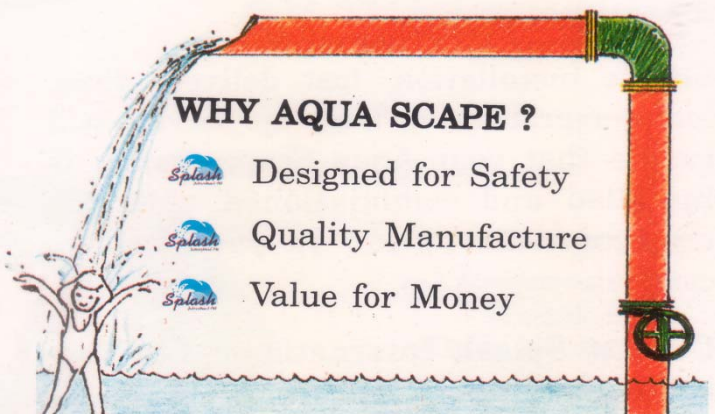

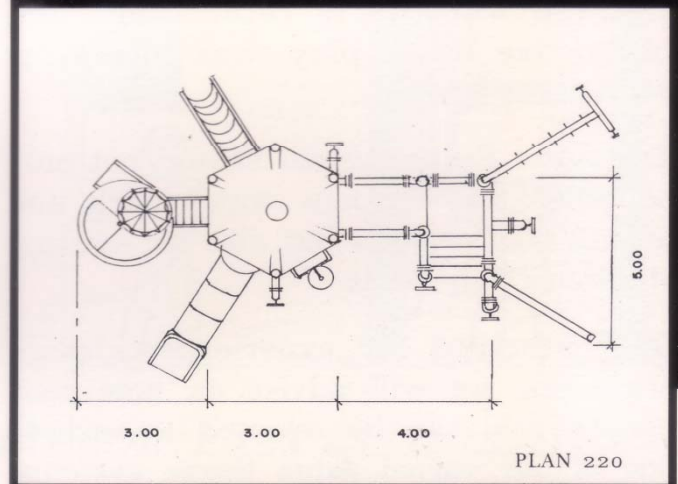

Splash International Ltd offer a wide range of safe, colourful interactive water play systems, providing hours of fun for children of all ages. All Aqua Scape systems are available to a standard configuration or custom made to suit a theme design of your choice. Each and every component used within the Aqua Scape systems are designed and manufactured to the highest quality standards.

Utilising high specification fully galvanised steel, coated with a chlorine and chemical resistant finish, the Aqua Scape system will ensure a long working life and minimal maintenance.

Our system designs encourage children to actively participate in water play in a safe and exciting environment. By operating valves, pulleys and levers which produce various forms of waterfalls, sprays, spouts and jets, children are able to enjoy an interactive water play experience.

Aqua Scape systems will leave the children wanting to return for more interactive water play thus increasing your parks revenue.

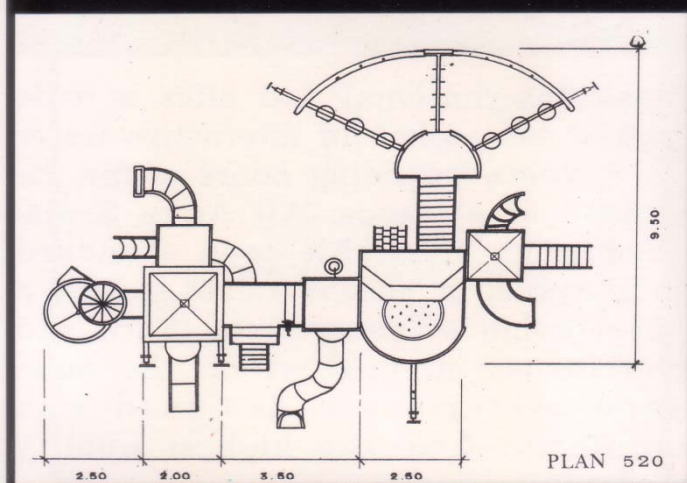

Aqua Scape systems will leave the children wanting to return for more interactive water play thus increasing your parks revenue.

The Aqua Scape system should not only be considered for new water park and leisure pool projects but also for existing children's play pools.

By contacting our experienced design engineers, we will advise on how your leisure pool can be adapted to include one of our varied Aqua Scape systems, alternatively we will design the suitable Aqua Scape system to compliment your new leisure project.

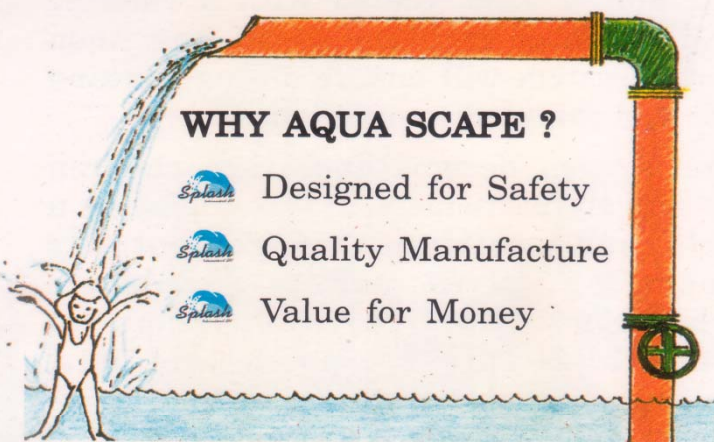

Simple installation, fast delivery time, and comprehensive back-up service will ensure that your Aqua Scape system is installed and commissioned with the minimum disruption to your leisure complex.

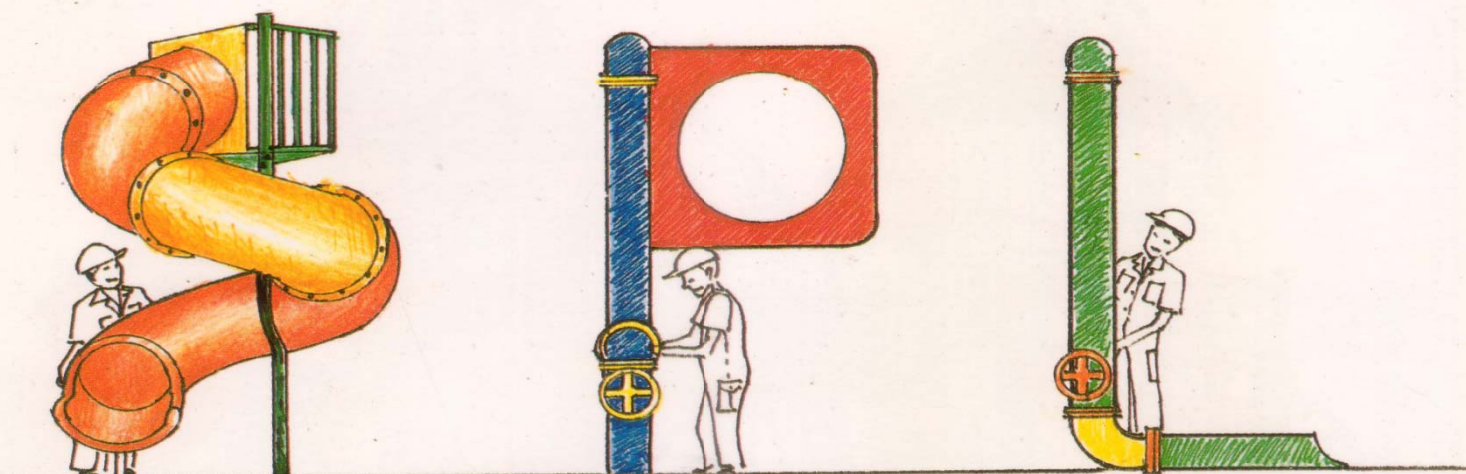

Contact Splash International Ltd now to transform your water park or leisure pool into an exciting water playground.
