You will need per light

- 1 x Deck connection box

See:

[400202 Deck Box Pro](#)

or

[400201 Plastic deck box](#)

or

[400200 Plastic deck box with conduit](#)

- 1 x [400104 TF-20](#) 20W transformer

* Note: Does not fit vacuum ports (suction fittings) sold in Thailand. The thread has a different pitch.

Optional:

[remote control](#)
with
additional lighting
effect features for
up to 16 lights

1. Use only 13.5 grade blue PVC pipe 1½" diameter.
2. Install the pipes in the walls *before* casting the concrete, in the same way as pipes for vacuum ports and return eyeball jets.
3. Cut the protruding pipe off *after* installing the tiles or Pebblecrete.
4. Install one deck box per light in the pool coping or surround.
5. Remove the white rubber ring from the light body.
6. Use either bezel type A or Bezel type B.
7. Attach the cable firmly and pull through to the deck box.
8. Do not cut off any excess cable.

Remove this white rubber ring
