

Compact

Even and soft heat.

Vega Compact

Powerful package for a small sauna.

Harvia Compact is a high-quality electric heater made of stainless steel. It is a safe and user-friendly heater designed for small saunas intended for 1 to 2 people. The heater is equipped with a built-in illuminated control panel on one side, improving user comfort. The heater is supplied complete with a water collection tray at the bottom and a wooden heater guard that gives the heater an individual look. The symmetrical design of the Compact heater makes it easy to place and install in the sauna.

The Compact JM20, JM25 and JM30 models are equipped with a built-in control panel. The models JM20E, JM25E and JM30E are controlled by a separate control unit (for example Griffin or C90).

Harvia Vega Compact is a powerful package for a small sauna. Vega Compact is easy to use, because the operating switches are placed ergonomically in the upper part of the heater. The heater can be mounted very low on the sauna wall so it provides heat for the lower benches as well.

Vega Compact is easy to install. Just mount the rack to the wall, lift the heater to the mounting rack and fix it on to it with one screw. The heater is made of stainless steel.

Vega Compact is available in models BC23 and BC35 which are equipped with a built-in control unit. Models BC23E and BC35E are controlled by a separate control unit (for example Griffin or C90).
